

An ISO 9001:2015
Certified Company

Manufacturer & Supplier of Metal Components & Fittings

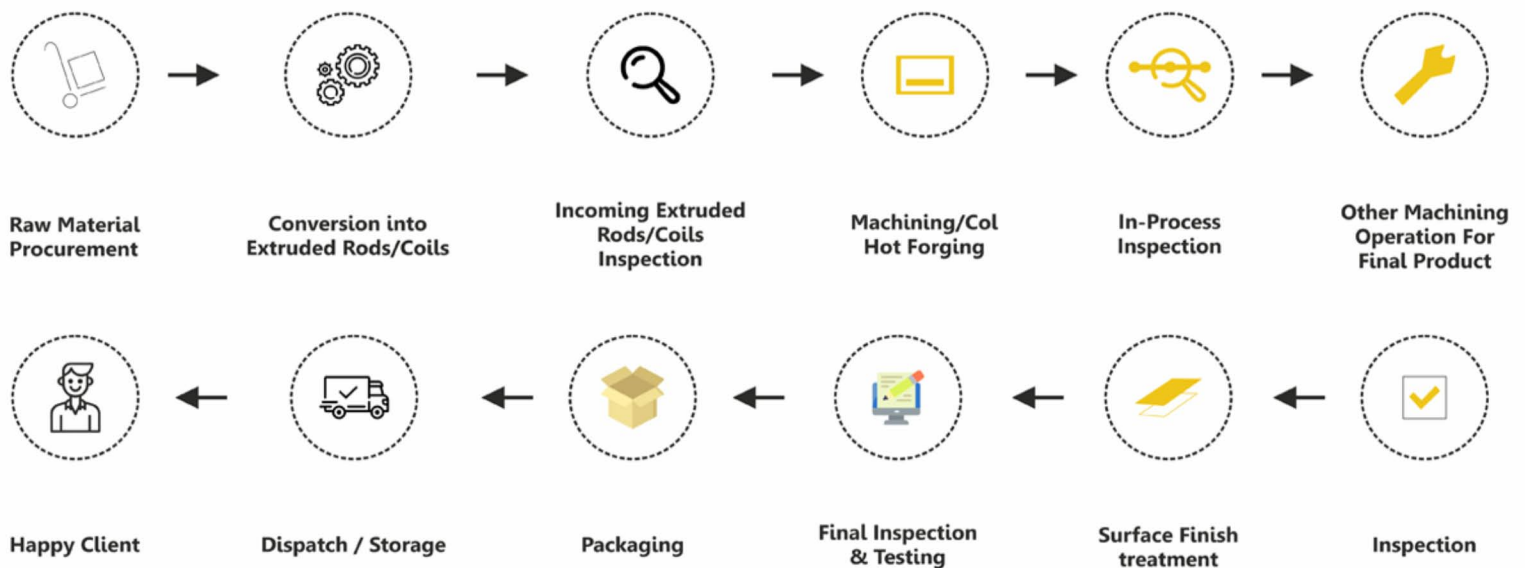

About Us

With years of experience in this industry, we are trusted for providing high quality customized metal components & fittings. We are using our 20+ years of experience and comprehensive expertise to serve best quality products with timely delivery and most efficient cost to our customers. We have built on engineering excellence crafted through our continuous dedications towards best quality products, innovation in our manufacturing capabilities and an objective to serve our products to global market. Our main aim is to meet customer quality benchmarks at an outstanding value.

Our company is a value driven organization based on the strong foundations of reliability, innovation and pioneering technology working towards the ultimate core focus of maximizing highly delighted customers worldwide. We believe in quality, honesty, transparency and are committed to produce high quality components as per client's Drawings, Samples or Standard reference.

Our Working Process

We adhere to standard working process along with strict quality control measures and use high-quality materials. Our experienced team ensures every detail meets our high standards and client's requirement.

Our Mission

To continuously strengthen and upgrade our manufacturing processes, quality systems, and people competencies by training & education and providing a safe workplace.

Our Vision

To provide high-quality, value-added precision and fastening solutions and services, positioning our clients ahead of the competition and at the forefront of technology.

Innovation

Encouraging a culture of innovation, promoting creative thinking, and continuously exploring new technologies and solutions to stay ahead in the industry.

Quality Assurance

Madhav Metal is dedicated to supply only best quality industrial products which are designed to work with the most rigorous applications. Our products and raw materials are certified by authorize laboratories after rigorous testing requirements which are conducted under the expert professionals of certified bodies. Continuous improvement is our ongoing process. We have adopted quality assurance program to meet ISO standards. Our quality control system will meet ISO requirements by implementing advanced stage in our inspection, testing and packaging process. All products made by Madhav Metal are tested and inspected by certified professionals. Our measuring instruments are also calibrated by accredited authorities.

Instruments & Gauges

Instruments are heartbeats of industry. To assure good quality of prodcuts, quality instruments are required. Company has invested a good amount to have all type of measuring equipments including all instruments and gauges.

Profile Projector

Vernier / Caliper

Hardness Testing Machine

Micro Meter

Gauges

Modern & Innovative Manufacturing Unit

We have established a state of art infrastructure with latest automated machineries which is segmented into different divisions for smooth and hassle free working. With over 10,000 sq. ft. manufacturing area, segmented for each area of operation, each segment has necessary facilities including modern machineries and tools. Our infrastructure has not only enabled smooth production of large batch but also helped us to make our position strong in global market.

We prioritize excellence through our state-of-the-art in-house manufacturing facility, equipped with cutting-edge machinery and operations leveraging innovative technologies. The industrial landscape boasts the latest and ultra-modern automatic equipments that defines the pinnacle of technological advancement, managed by a team of highly experienced and skilled staff dedicated to producing materials of controlled quality. This machinery is not only a testament to our dedication to staying at the forefront of industry standards but also a reflection of our commitment to quality.

● Cable Glands & Accessories

Cable Glands are the most reliable and durable components for securing and protecting the cables and required elements in hazardous or harsh environments. Cable Glands are made of various metals including Brass, Stainless Steel, Plastic, Aluminium, Nickel Plated Brass and more. The function of Cable Glands is to protect the Conductors and Cables from mechanical damage and protect assembly against ingress of dust and moisture. Depending on Cable Glands and their applications, the different types of Cable Glands Accessories including Earth Tag, Lock Nut, Reducer, Adapters, PVC Shrouds, Serreted Washers and more are manufactured according to International Standards.

● Earthing Accessories

Earthing System is very essential to be properly designed & installed to safeguard both lives & the equipment. Sometimes it happens that though the earthing system is installed, current leakage is felt & short circuit may happen. To avoid this a correct Earthing System embracing correct earthing accessories is very important to take care of. Corrosion resistance, conductivity and mechanical strength are essential considerations in earthing accessory design to ensure an earthing system remains operative for many years. Earthing Accessories have high quality copper alloy material which provide wanted strength to the part to ensure its proper mechanism.

Electrical Components

We are manufacturing all kinds of Electrical Components, Electrical Parts and Electrical Fittings like Electrical Plug Pins, Sockets Pins, Neutral Links, Terminal Blocks, Connectors, Brass Contacts and more. Electrical Components are consumed in various applications like Toggle Switches, Modular Switches, Switchgears, Fuse Switches, Plug Pins & Sockets and many Electrical & Electronics Equipment or Parts. Electrical Components are used in various industries including Power Generation, Electronic Industry, Solar Energy, Automotive Industry, Medical Industry, Electrical and Engineering Assembly.

Stainless Steel Components

We Manufacture Stainless Steel Components, Stainless Steel Machine Components, Customized Stainless Steel Components, etc. Our products are known in the market for their superior varieties and durability. These are widely appreciated for their sustainability, reliability and precise designs. We ensure the most reliable products which are available in the best specification at the most profitable price range. Our products use in many industries like Automotive, Material Handling, Textile Industry, Medical & Engineering Sectors.

Aluminium Components

Aluminium Components are used in the automobile, electrical, electronics, mechanical, telecom and plastic industries. Owing to their high corrosion resistance and optimum finish, Aluminium Components are widely demanded in the market. As all our products are developed using technologies best suited to the latest industrial applications and consumer demands, they are known for exhibiting rich attributes. Aluminium Components are known for Rugged Construction, Assuring Proper Fitting, Durability, Outstanding Performance and Low Maintenance. These Aluminium Components are available in different sizes and configurations in the market as per customer requirements and specifications.

Mild Steel Components

We are specialized in manufacturing of Mild Steel Components. We have strong command in the machining of this material as well as its variant grade like the EN series. While machining we keep our specified tolerance to achieve the final size easily. We work for high precision and accuracy. We are supplying these parts to Electromechanical Industries, Fasteners, Automobile Industries, Electronic and Electrical Fittings. Any kind of Mild Steel Turned Components can be developed and supplied exactly as per customer specifications.

Brass Turned Components

We are engaged in offering a wide range of Brass Turned Components to our clients at a reasonable cost. Our turned components are made using quality raw material such as high and fine grade brass to assure quality and reliability. We manufacture all types of Brass turned components depending upon client's requirement for application in any industry. The range of Brass Turned Components find wide application in machine building, automobile, hydraulics and general engineering industry.

Sheet Metal Components

Sheet Metal / Stamping Parts are used in varieties of applications like riveting, Fitting, Supports, Locking, Fastening & for various uses in electromechanical & Automobile Industries. It comprises a lot of types like Washers, Lugs, Tags, Gaskets, Links, Banana Plugs, Terminals, Tapping Clips, Hinges etc. Apart from Plain Washers, all other varieties are exclusively developed as per custom designs & demands. Sheet Metal Components are generally made from Brass, Copper & Steel which are the universally used in most of the applications. Flat Washer, Star Washer, Teeth Washer, Spring Washer & Split Washers can be made available as per specific requirement.
